

Mitsubishi Lancer (2000-2007)

INSTALLATION OF THE ARMREST COVER (with optional padding)

Tools Required:

- Philips screwdriver to remove and replace the armrest screws
- That's all you need!

1. To remove the armrest lid open it up and remove the screws marked in red.

2. Apply your new RedlineGoods armrest cover on top of the lid as shown in the picture. It should stay perfectly in place without glueing or stapling it thanks to the elastic band.

3. Replace the newly re-upholstered armrest lid and screw back the eight screws you removed earlier.

4. All done! Enjoy your new armrest cover!
